Getting started

Before participating in this marketplace, you'll first need to register your company with [SAM.gov](https://sam.gov) and have a GitHub account. If you encounter any issues, let us know at micropurchase@gsa.gov.

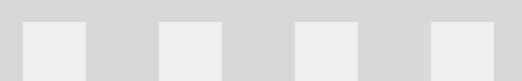

Once you're ready, continue with GitHub authorization (only public account information will be requested).

[Authorize with GitHub »](#)

Add in language about information being made public. Also link to Policies and Guidelines page.

[GITHUB AUTH]

This is the sandard GitHub authorization page.

Complete your account

Enter your DUNS number. Remember, [SAM.gov](https://sam.gov) registration is required to place bids. If you need help, email us at micropurchase@gsa.gov.

Continue »

Confirm details

Here's what we found in SAM.gov:

My Company, LLC
1600 Pennsylvania Ave NW
Washington
DC
20500
USA

You're now ready to start placing bids. Are you authorized to bid on behalf of this organization?

[« Edit My Info](#)[Yes, I am »](#)

If DUNS cannot be found (response.code == 404)

Confirm details

We couldn't find your company info. Please check your DUNS number in SAM.gov and try again. If you think this is an error, contact us at micropurchase@gsa.gov.

Title of Project Name Goes Here

As [previously explained](#), this issue has been tagged as a "micro-purchase" issue. The opening "bid" for this issue is \$3,499, and vendors may offer lower bids. The vendor with the lowest bid at closing time will have 10 working days to provide code that satisfies the requirements and acceptance criteria below. Upon successful completion, the vendor will be paid. If the vendor fails to complete the requirements and satisfy the acceptance criteria within the 10 working day period, then the vendor with the next lowest bid shall have 10 working days to provide the code. If the acceptance criteria are not satisfied, vendors shall not receive payment pursuant to this competition.

Description of issue

Currently, CALC uses a [management command to load data](#) from 7 different schedules. We want to load the Schedule 70 data provided into CALC (note, the data will likely need to be reformatted). The data is available here: <https://github.com/18F/calc/tree/s70/contracts/docs/s70>

Acceptance criteria

1. Either a new Django management command or modification to https://github.com/18F/calc/blob/master/contracts/management/commands/load_data.py to load the Schedule 70 as Contract objects in the database.
2. Whether a new command or a modification to the existing command, the rating from <https://codeclimate.com/github/18F/calc> for the file must be at a B or better rating, and test coverage for the command at 90% or better upon completion.
3. Front-end changes to ensure the ability to filter results by schedule type (e.g. Schedule 70 data or others) and easily see the schedule source for each row in the results.

Bid submission deadline

Bids for this issue close at 12 p.m. EST on Thursday, Oct. 29, 2015.

Status:

For Sprint 1, let's keep status simple as either 'Open' or 'Closed'. Can move to a more nuanced system later.

Responsive considerations

> 600 px: Right rail stays the same size and left column is fluid.

< 600 px: The right rail moves below the project description
